

Spotwave indoor wireless solutions ensure cost-effective “always-on” coverage

From hospitals to governments and municipalities, IT companies and retail stores, Spotwave has been deployed in thousands of facilities.

Fast facts Corporate profile

Spotwave provides carrier-approved, indoor wireless coverage solutions; providing reliable, “always-on” wireless coverage. Spotwave-equipped wireless carriers and enterprise customers take advantage of a simple, affordable, effective way to ensure wireless devices have excellent coverage.

Why Ottawa

Spotwave is proud to be located in what the company believes to be one of the world’s most desirable wireless ecosystems. Four of the globe’s top five wireless companies — Alcatel-Lucent, Cisco, Ericsson and Huawei — all have significant R&D facilities in Ottawa.

Business advantage

For enterprise customers, Spotwave helps maximize return on wireless investment with a solution which will boost indoor coverage and employee mobility — that’s great for business.

For carrier customers, Spotwave’s indoor coverage solutions help win new business, increase retention, differentiate on coverage and ensure customer satisfaction.

Since 2001, Spotwave Wireless Ltd. has led the wireless industry as a manufacturer of in-building wireless coverage systems for Cellular and PCS networks. Spotwave products currently support: GSM, GPRS, EDGE, IS-95 CDMA, IxRTT, and IxEVDO, with the introduction of HSPA, LTE, and UMTS as of mid-2010. These products enable Spotwave to provide wireless solutions for enterprise customers and carriers around the globe.

Canada's Creative Economy Capital

Spotwave provides carrier-approved, indoor wireless coverage solutions; providing reliable, “always-on” wireless coverage. Spotwave-equipped wireless carriers and enterprise customers take advantage of a simple, affordable, effective way to ensure wireless devices have excellent coverage.

Spotwave’s indoor coverage solutions seamlessly bring the outdoor signal inside — ensuring your wireless devices work reliably indoors where they are used more often.

From hospitals to governments and municipalities, IT companies and retail stores, Spotwave has been deployed in thousands of facilities. Whether the coverage problem is in a conference room or a manufacturing floor, a hospital wing or a home office, Spotwave products deliver. Spotwave indoor wireless coverage benefits include:

- Mobilize your workforce with new wireless data applications that work indoors
- Optimize your resources so your customers can reach your sales and support teams — even when they’re away from their desks
- Ensure security and safety for your employees and visitors in areas such as stairwells and parking garages

The SpotCell® family of indoor coverage systems is the solution of choice for carriers and their customers requiring reliable indoor more.

Spotwave's solutions are unique in that they provide intelligent, adaptive indoor coverage that seamlessly brings the outdoor signal inside — ensuring that cell phones and wireless devices work reliably indoors. This can significantly change the economics of in-building wireless coverage.

wireless connectivity. SpotCell® systems provide targeted coverage for spaces ranging from 2,500 square feet to 100,000 square feet.

SpotCell® products are carrier-specific, easily deployed, cost-effective coverage solutions for all technologies. Once installed, a SpotCell system requires no maintenance or adjustments and is guaranteed to protect signal integrity under changing conditions.

Spotwave's products are deployed by the top Caribbean and North American Wireless carriers and by thousands of enterprises and consumers with emerging marketing in Europe and Latin America.

Why Ottawa

Spotwave is proud to be located in what the company believes to be one of the world's most desirable wireless ecosystems. Four of the globe's top five wireless companies — Alcatel-Lucent, Cisco, Ericsson and Huawei — all have significant R&D facilities in Ottawa. They are part of a 367-company, 27,000-employee strong talent bank that spans the breadth of wireless infrastructure and services.

Ottawa's home-grown wireless stars include Spotwave along with DragonWave and Bridgewater Systems. Regional powerhouses Research In Motion (RIM), Rogers

Communications, and SiGe Semiconductor also have significant campuses in the city. Wesley Clover, the Ottawa-based venture capital firm headed by Ottawa technology billionaire Sir Terence Matthews, currently directs 60 per cent of its funding at new wireless startups.

Ottawa is also home to two nationally funded laboratories — Communications Research Centre and the National Research Centre, and two universities (Carleton University and University of Ottawa) that continually fuel new wireless innovations.

Business advantage

The benefits of Spotwave's products for our enterprise and business customers, and for carriers, are clear.

For enterprise customers, Spotwave helps organizations in a variety of environments maximize their return on wireless investment with a solution which will boost your indoor coverage and employee mobility — that's great for business.

For carrier customers, Spotwave's indoor coverage solutions help win new business, increase retention, differentiate on coverage and ensure customer satisfaction.

Spotwave's solutions are unique in that they provide intelligent, adaptive indoor coverage that seamlessly brings the outdoor signal inside — ensuring that cell phones and wireless devices work reliably indoors. This can significantly change the economics of in-building wireless coverage.

Future growth plans

Acquired by Bangalore, India-based Kavveri Telecom Products Ltd. in 2008, Spotwave is now a wholly owned division of Kavveri Telecom Products., a leading manufacturer providing a robust portfolio to the wireless industry.

Founded in 1991, Kavveri Telecom Products is uniquely positioned to offer Spotwave's products among a vast array of world standard products and solutions for wireless telecom manufacturers, service providers and end users. Kavveri Telecom has been Awarded as the winner of "Deloitte Technology Fast 50 India" for two consecutive years in a row.
